

Hamza Khalid

FA24-BCS-040

Lab Assignment Details:

Assignment 1 — Your Personal CV Page

Difficulty: Foundational · **Covers:** Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model) · **Folder:** assignment-1/

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An “About Me” section.
- An “Education” section listing your academic history in a semantic list or table.
- A “Skills” section.
- A “Contact” section with a real `<a href="mailto:...">` link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout — `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<footer>` as appropriate, not a page built entirely out of unstyled `<div>`s.
- Styling entirely in a separate `styles.css` file (external stylesheet, not `inline style=""` attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.

Deliverables in assignment-1/: `index.html`, `styles.css`, any images, and your completion PDF.

🌐 Github Portfolio

Profile

Computer Science undergraduate at COMSATS University Islamabad (Lahore Campus), 5th semester, with hands on experience across networking, databases, and applied AI — including a TLS-secured load balancer, a real-time collaborative whiteboard, and a rule-based expert system. Comfortable working across the stack in C++, Python, and Java, with a track record of translating coursework into working, documented software.

Education

BSC Computer Science	Comsats University Lahore	2024 - in progress
FSC	Aspire Group of Colleges	2022 - 2023
Matriculation	Govt. Higher Secondary School	2019-2021

Technical Skills

- Languages: C++, Java, Python, JavaScript, SQL
- Web, UI: HTML, CSS, JavaFX
- Sol Server

Projects

Factory Simulator

- Built the core project structure for a 3-person team and implemented key logic using Dijkstra's algorithm, stacks, and queues for simulation flow.

Nearkest – Community Restaurant Explorer

- Built the JavaFX desktop client for a cross-platform restaurant discovery app (paired with a teammate's Android client), backed by a shared Firebase database.

Habib and Sons E-commerce Platform

- Led requirement gathering and designed the database schema for a full-stack e-commerce platform built by a 3 person team.

Extra Curricular

- Cricket
- Chess

Languages

- Urdu
- English
- Punjabi
